

# ARS LONGREACH™ PRUNERS

## How do I know which model I have?

One of the most common questions we receive is which model of the LongReach™ Pruners our customers have. We have developed these questions to guide you to the correct model number. Note the ZR and ZF telescoping series have the model number on the joint case.

## TELESCOPING UNITS:

Is the **JOINT CASE** (case you use to extend the pruner) **BLACK**?

**YES** -

Is there a **TILT CASE** with a dial nut by the blade end which allows the blade to tilt back and forth and you can lock it in with the dial nut?

**YES** - This is the **“ZR” Telescoping Series.**

- LA-160ZR203: 4' - 7' with the Cut&Hold head
